HAND-LIST
OF
G E N E R A A N D S P E C I E S
OF
B I R D S,
DISTINGUISHING THOSE CONTAINED
IN THE
BRITISH MUSEUM.

BY
GEORGE ROBERT GRAY, F.R.S. ETC.,
ASSISTANT KEEPER OF THE ZOOLOGICAL COLLECTIONS.

PART III.
STRUTHIONES, GRALLÆ, AND ANSERES,
WITH INDICES OF GENERIC AND SPECIFIC NAMES.

LONDON:
PRINTED BY ORDER OF THE TRUSTEES.
1871.

PRINTED BY TAYLOR AND FRANCIS,
RED LION COURT, FLEET STREET.

PREFACE.

THE object of this Hand-List is to give a complete List of all the Genera with their subdivisions; and also a comprehensive List of the species of Birds under the respective divisions to which they are supposed to belong.

The specific name in Antique (or thick) type exemplifies those species that are contained in the British Museum; whilst the Roman (or thin) type exhibits those species that are at present desiderata to the Collection.

Various errata have been corrected in the Index of Specific Names; wherein will also be found numerous additional synonyms, which are distinguished by = before the number; while species that have been subdivided, and some that are new, which are not previously recorded in the text of the book, are shown by the letter ^a, ^b, &c., being affixed after the number of the nearest allied species of the genus to which it belongs, thus completing, as far as possible, the List of Species down to a very recent date.

JOHN EDWARD GRAY.

July 8th, 1871.

TABLE OF GENERA AND SUBGENERA.

PART III.

6. STRUTHIONES.

1. STRUTHIONIDÆ.

1. Struthioninæ.
